

## GROWTH - EUR

Investment plans Liechtenstein, Plan No. 153  
Monthly Report, 01.02.2024

### Investment Goal

Investments are primarily made in the euro, as well as in the Swiss franc and pound sterling. With an equity component of just under 40%, this plan pursues a growth-oriented investment strategy, whereby major periodic price fluctuations are possible. The remaining component is invested in bonds and term deposits, thereby providing good prospects of achieving an attractive return with limited risk. This plan is suitable for long-term investment horizons.

This product flyer and the figures and explanations contained therein are for general information purposes only and do not contain an individual recommendation nor personal investment advice. To establish your specific investment requirements and preferred levels of risk, we advise you to consult your advisor.

The performance is calculated on the basis on a unit-linked insurance financed through a single premium payment. Regular premiums result in other performance figures because of the different timing of the investment. Historic performance data are furthermore no guarantee of future returns. The future performance of investments cannot be deduced from previous market development, i.e. the value of an investment may fall as well as rise. The prices used to calculate performance correspond to the inventory values published by the fund management companies at the beginning of the month, plus or less any commissions.
