

GROWTH - CHF

Investment plans Liechtenstein, Plan No. 154
Monthly Report, 01.02.2024

Investment Goal

Investments are primarily made in the strong Swiss franc, as well as in the euro and pound sterling. With an equity component of approximately 40%, this plan pursues a growth-oriented investment strategy. The remaining component is invested in bonds and term deposits, thereby providing good prospects of achieving an attractive return. This plan is suitable for longer-term investment horizons.

To establish your specific investment requirements and preferred levels of risk, we advise you to consult your advisor.

The performance is calculated on the basis on a unit-linked insurance financed through a single premium payment. Regular premiums result in other performance figures because of the different timing of the investment. Historic performance data are furthermore no guarantee of future returns. The future performance of investments cannot be deduced from previous market development, i.e. the value of an investment may fall as well as rise. The prices used to calculate performance correspond to the inventory values published by the fund management companies at the beginning of the month, plus or less any commissions.
