GROWTH REAL - USD

Investment plans Liechtenstein, Plan No. 129

Quarterly Report, 01.07.2019

Investment Goal

The investment is dominated by dollar securities. The proportion of the bond funds exceeds the proportion of the equity funds slightly. Due to the repartition of the investment over different funds of renowned investment companies, strong price fluctuations can be avoided. The objective is to generate a considerable performance at limited risk.

The performance is calculated on the basis on a unit-linked insurance financed through a single premium payment. Regular premiums result in other performance figures because of the different timing of the investment. Historic performance data are furthermore no guarantee of future returns. The future performance of investments cannot be deduced from previous market development, i.e. the value of an investment may fall as well as rise. The prices used to calculate performance correspond to the inventory values published by the fund management companies at the beginning of the month, plus or less any commissions.
